Languages

French

My native language.

English

I completed part of my high school diploma in English.

Spanish

Studied it for 6 years.

Soft Skills

Good communication skills

Autonomy and rigor

Logical and analytical mindset

Ability to quickly grasp and learn new concepts

Interests

Travel

Passionate about exploring new places and cultures.

Football

I have had a strong interest in this sport since childhood.

Mechanics / Car

I have been immersed in it since childhood, and it remains one of my passions today.

Certifications

ANSSI Cybersecurity MOOC
(French National Cybersecurity Agency)

CNIL Data Protection MOOC
(French Data Protection Authority)

Other IT Competences

NAT / VPN

Setup of network address translation and secure remote access.

DNS / DHCP

Configuration and management of core network services

SSH / Web Services

Secure remote administration and web service management.

Sajid Marzouqy

IT & Technology Apprentice

Currently studying Networks and Telecommunications at Sorbonne Paris North University, I am looking for an apprenticeship to develop my skills and gain hands-on experience in IT systems and security. Motivated and eager to learn, I want to contribute to your company while improving my technical expertise.

Degrees and Training

BUT Networks and Telecommunications

Since September 2024 [University Sorbonne Paris Nord](#) Villetaneuse

The BUT Networks and Telecommunications program trains students in network infrastructures, cybersecurity, and IT systems.

Baccalaureate

From September 2021 to June 2024 [Andrée Boulloche](#) Livry-Gargan

High School Diploma with Honors, specialized in Mathematics, Physics and English.

IT Work & Technical Projects

AI Trainer – NLP & Code Review

Since December 2024 [OUTLIER](#) United States

- Evaluated and categorized AI-generated responses in French, English, and code (Python, React, JavaScript, etc.), ensuring accuracy and compliance.
- Conducted code reviews to verify syntax, logic, and consistency.
- Improved AI model performance by identifying errors, biases, and inconsistencies.

Python Data Processing & Web Development

From November 2024 to January 2025 [Independent IT Project](#) Paris

- Developed a Python-based web application for processing and analyzing monument data in France.
- Collected, cleaned, and structured large datasets for analysis.
- Implemented basic geolocation features to enhance data visualization.

Web Development – Personal Portfolio

From October 2024 to March 2025 [Independent IT Project](#) Paris

- Designed and developed a responsive portfolio website.
- Implemented React (HTML, CSS), and JavaScript for dynamic UI.
- Hosted the website using GitHub.

Cybersecurity Simulation (Cyberattack Project)

From October 2024 to January 2025 [Independent IT Project](#) Paris

- Set up a virtualized environment to simulate a cyberattack.
- Detected and neutralized threats using security tools.
- Identified vulnerabilities and implemented security measures.

IT Skills & Knowledge

Programming & Database Skills

- **Python** – Data processing, automation (scripts, file/CSV management), and OOP.
- **HTML & CSS** – Website structure and responsive design.
- **SQL** – Data querying, manipulation, and database structure management.

Networking & Security

- **Firewall Configuration** – Understanding and applying simple firewall rules.
- **VLANs** – Network segmentation and setup.
- **Microsoft Ecosystem** – Familiar with Windows, Azure basics, Office 365, and SharePoint.

Systems & Virtualization

- **Windows 11 & macOS** – Basic system management (settings, updates) and basic terminal usage (PowerShell, Zsh).
- **Linux** – Basic commands for file management and network settings (DHCP, VPN).
- **VirtualBox** – Creating and managing virtual machines.
